Submitted VIA EMAIL

RE: Route 28 Asphalt Material Supplies, Inc. **DEC Facility # 3-5199-00042** Mined Land File # 30696 Town of Kingston, Ulster County **EPPP Progress Report**

Dear Ms. Crist:

JMT of New York, Inc. (JMT), on behalf of Route 28 Asphalt Material Supplies, Inc. (Route 28), respectfully submits this Enhanced Public Participation Plan (EPPP) progress report in accordance with the procedures established in CP-29 Section 5.D and the New York State Department of Environmental Conservation (NYSDEC)approved project-specific EPPP. This progress report serves to document progress on meaningful and effective public participation that has occurred during the NYSDEC environmental permit review process to-date.

Included with this progress report are:

- Attachment I: Affidavits of Publication
- Attachment II: Contact List
- Attachment III: Certified Mail Receipts
- Attachment IV: Meeting Roster
- Attachment V: Public Meeting Minutes and Q&A Questions
- Attachment VI: Table 1 Summarized Meeting Comments and Responses.
- Attachment VII: Additional Public Correspondence
- Attachment VIII: Virtual Public Meeting Invites and Fact Sheets

As described in the EPPP, the applicant's hot mix asphalt (HMA) facility is located on New York State Route 28 in the Town of Kingston, Ulster County, New York within the boundaries of the Route 28 Quarry. On July 31, 2023, Route 28 applied for an Air State Facility Permit (3-5199-00042/00008) for the proposed operation of the existing HMA plant. The applicant will produce HMA from the HMA plant within the current Life of Mine boundaries of the Route 28 Quarry. As the NYSDEC is aware, Route 28 has chosen to purposely limit production to 30,645 tons per year to comply with mass emission limits for formaldehyde, and therefore, an Air State Facility Permit is needed so that the Division of Air Resources (DAR) can enforce the limitation by way of a permit condition. The NYSDEC issued a Notice of Complete Application (NOCA) on January 2, 2024.

After receiving the NYSDEC-issued NOCA, Route 28 published a notice in the Daily Freeman on January 4, 2024, as specified in the NOCA. An additional notice was published in the Daily Freeman on January 16, 2024, to notify the public of the scheduling of the project-specific virtual public meeting, an event held as part of the implementation of the approved EPPP. Consistent with the approved EPPP, the notice of the virtual public meeting was published at least two (2) weeks prior to the event. The virtual public meeting notice included instructions on how to participate via computer and/or telephone and how to access project documents via an online repository. Proof of publications for both notices are included in Attachment I: *Affidavits of Publication*.

As described in the approved EPPP, a contact list consisting of the names, addresses, phone numbers, and/or email addresses of stakeholders within a half mile of the proposed action was developed in the submitted and NYSDEC-approved EPPP and is included in Attachment II: *Contact List*. The contact list returned no results for sensitive receptors (i.e., senior living, schools, and daycare facilities) within 5,000 feet of the facility. Subsequently, a contact list using similar methods was provided for parcels impacted by mobile emissions generated by truck travel between the facility and Route 209 (Table 2- Mobile Emission Corridor in Attachment II: *Contact List*). Consistent with the approved EPPP, each stakeholder identified in both contact lists was contacted at least two (2) weeks prior to the public virtual meeting via USPS-certified mail and were provided a "Virtual Public Meeting" invite and a "Fact Sheet" that disseminated information about the consolidated Air State Facility Permit application review process, how to join the virtual public meeting, how to access the online document repository, and how to submit written comments. Copies of the certified mail receipts associated with the outreach effort are provided in Attachment III: *Certified Mail Receipts* and show that out of thirty- two (32) letters sent, twenty-two (22) were received, two (2) were returned with no response, and eight (8) are still outstanding at the time of this progress report.

Consistent with the approved EPPP, an online document repository was established for the community and interested stakeholders to access and review information about the project. The online repository is available at https://jmt.com/rt-28-asphalt/ and provides information and documents related to the project and permit application. The repository has been updated throughout the application process with project-related information and written materials. To-date, the online repository includes the following documents:

- Enhanced Public Participation Plan;
- Notice of Complete Application;
- Air State Facility Permit Application and Mining Permit Modification Application;
- Site Plan:
- Resolution of Conditional Approval;
- Notice of Determination of Non-Significance;
- Community Risk and Resiliency Act & Climate Leadership and Community Protection Act Section 7(2) and 7(3) Analysis;
- Project Permitting History and Previous Determination of No Significant Adverse Impacts;
- Draft Air State Facility Permit; and
- EPPP Progress Report.
- Public Comment Period Extension
- Additional Public Correspondence

An hour-long virtual public meeting for the Route 28 HMA project was held on January 31, 2024, at 11:00 AM via the Microsoft TeamsTM platform ("Teams") for purposes of community outreach on the NYSDEC draft Air Facility Permit. The Town of Kingston acted as SEQRA lead agency in coordinating the review of the local Site Plan and Special Use Permit applications with other involved agencies including the NYSDEC. The Town issued a Negative Declaration that is binding on all other involved agencies including the NYSDEC.

The virtual meeting allowed the public to access the meeting through the Teams web application or by calling in using a distributed phone number. According to the meeting attendance, twenty-eight (28) members of the public attended the meeting. The meeting attendees included nearby residents, local businesses, business competitors, news media, environmental conservation groups, local government representatives, and members of local town agencies. A complete list of meeting participants is included in Attachment IV: *Meeting Roster*. No language or disability assistance requests were received by Route 28 before the first virtual public meeting, nor have any such requests been received to-date.

Edward Davidson, of JMT and consultant to the applicant, served as the meeting facilitator. Joseph Castiglione of Young/Sommer LLC, counsel to the applicant, assisted in some of the answers to the questions from members of the public. At the beginning of the virtual public meeting, JMT informed the public of participation and commenting logistics. Attendees were provided the option to comment using the question and answer ("Q&A") feature or by providing verbal comment. JMT then provided a summary of the project, an update on the permit application review process, and identified outstanding application requirements and future milestones in the application. Following the introduction and project summary, the remaining forty-five (45) minutes of the meeting was open for public comments and questions. The attendees were informed during the meeting that written comments may be submitted until the close of the comment period. The facilitator asked before closing the meeting if any attendee who hadn't yet spoken would like an opportunity to speak and no one identified themselves.

Meeting minutes and a copy of the Q&A portal is provided in Attachment V: *Public Meeting Minutes and Q&A Questions*. In addition, JMT has summarized a few of the main questions and comments identified by the public during the meeting, followed by JMT's responses. See table provided in Attachment VI: *Table 1 – Summarized Meeting Comments and Responses*. To-date, the only change to the project related to the NYSDEC permitting process and implementation of the EPPP is a slight reduction in proposed annual HMA production.

Following the first virtual public meeting, JMT received additional correspondence from two community members. No community member requested a second public meeting. Records of these correspondence are included in Attachment VII: *Additional Public Correspondence*.

Subsequent to the first virtual public meeting, NYSDEC issued a letter, dated February 2, 2024 with a subject heading titled "Requirement for EPPP Implementation" that required the applicant to hold a second public meeting based on the meeting not being conveniently scheduled. The NYSDEC was aware of the 11:00 AM start time for the public meeting, the meeting was very well attended, and no member of the public previous to the start of the public meeting or subsequent to the public meeting provided a written comment regarding the timing of the public meeting affecting their ability to attend or subsequently send written comments. Route 28 has agreed to hold a second virtual public meeting that has been scheduled for February 15, 2024, at 5:30 PM and reserves its right to challenge any further delays to the permit review.

The second virtual public meeting notice was published in the Daily Freeman on February 7, 2024 and the affidavit of publication will be forwarded to NYSDEC upon its receipt. Similar to the first virtual public meeting, all stakeholders identified in the contact lists will be contacted via USPS-certified mail and will be provided with a virtual public meeting invite and a project-specific fact sheet. Copies are included as Attachment VIII: *Virtual Public Meeting Invites and Fact Sheets*. The second virtual public meeting invite and updated fact sheet have also been uploaded to the document repository. Consistent with the approved EPPP, once the second virtual public meeting has occurred, Route 28 will submit a Final Summary Report and Written Certification, which will document the complete implementation of the EPPP. The comment period commenced on January 9, 2024 and the close of the comment period on February 23, 2024 provides the community with a reasonable time frame to submit comments.

We trust that this correspondence and the associated attachments adequately summarizes the progress Route 28 has made on the public participation process thus far and that it accurately portrays future steps, including the planned

second virtual public meeting on February 15, 2024. This progress report has been uploaded to the project-specific document repository. If you should have any questions or require further information, please do not hesitate to contact me at (518) 782-0882 or edavidson@jmt.com.

Sincerely,

JMT of New York, Inc.

Edward G. Davidson, PG Associate Vice President

New York State Department of Environmental Conservation Notice of Complete Application

Date: 01/02/2024

Applicant: RT 28 MATERIAL SUPPLIES INC 56 MID-DLE COUNTRY RD MIDDLE ISLAND, NY 11953

RT 28 ASPHALT MATERIAL SUPPLIES INC 56 MID-DLE COUNTRY RD MIDDLE ISLAND, NY 11953

Facility: Route 28 Asphalt Plant ST RTE 28 - N SIDE - E OF MOREY HILL RD KINGS-TON, NY 12401

Application ID: 3-5199-00042/00006

Permits(s) Applied for: 1 - Article 19 Air State Facility 1 -Article 23 Title 27 Mined Land Reclamation

Project is located: In MULTIPLE TOWNS in ULSTER COUNTY

Project Description:
The applicants propose the operation of an existing hot mix asphalt plant constructed at previously approved final approved mine elevations within the existing life of mine of the permitted hard rock quarry, Mined Land ID 30696. The Department has prepared a draft Air State Facility permit and has made a tentative determination, subject to public comment or other information, to approve the Air State Facility Permit application by Rt 28 Asphalt Material Supplies Inc for the Route 28 Asphalt Plant (formerly Route 28 Quarry): Rt 28 Material Supplies Inc remains the permittee, and applicant for modification of, the Mined Land Reclamation Permit. The applications consist of:

*A modification of the Mined Land Recla-mation Permit to replace the current reclamation plan of a vegetated, "gently sloping site" to the operation of the constructed asphalt plant.

*A new Air State Facility Permit for a 150 ton per hour hot mix asphalt plant. The low-NOx burner in the rotary aggregate dryer will fire proane. The facility will limit annual production (rolled-monthly) to no more than 32,000 tons, effectively limiting emissions of criteria pollutants below major source thresholds. Particulate emissions are controlled by a baghouse.

The facility is located in the Town of Kingston on Route 28, on the border with the Town of Ulster.

Availability of Application Documents: Filed application documents, and Department draft permits where applicable, are available for inspection during normal business hours at the address of the contact person. To ensure timely service at the time of inspection, it is recommended that an appointment be made with the contact person.

MEETING ROSTER

Meeting: Route 28 Asphalt Material Supplies, Public Engagement Meeting			
Meeting Date: January 31, 2024	Facilitator: Edward Davidson, JMT of New York, Inc.		
Time: 11:00 -12:00 pm			

	Name, Location		Name, Location
1.	Taylor Jaffe, Resident of Livingston Manor;	28.	845-726-4825
	Catskill Mountain keeper		
2.	Chad Butler, Resident of Hurley	29.	845-331-0495
3.	Richard Rosa, Peckham Industries	30.	Edward Davidson, JMT
4.	Larry Queipo, Town of Kingston	31.	David Straw, JMT
5.	Andy Mossey, Woodstock Land Conservancy	32.	Alex Carroll, JMT
6.	Emily Horowitz, Resident of Morey Hill Road	33.	Anderw Philbin, JMT
7.	Kevin Smith, Resident of Woodstock	34.	Joseph Castiglione , Young/Sommer LLC
8.	Elena Morgan, DEC Mining Program	35.	Dominic Testa, Route 28
9.	Robert Cologero, Town of Kingston, Code	36.	Richard Ostrov, Young/Sommer LLC
	Enforcement Officer		
10.	Joel Mason, Resident of City of Kingston	37.	Unknown*
11.	Kathy Nolan, Catskill Mountainkeeper	38.	
12.	Willam Kemble, Daily Freeman	39.	
13.	Douglas DeWitt	40.	
14.	Harper Taylor	41.	
15.	John-Paul Sliva	42.	
16.	Kevin McEvoy	43.	
17.	Larry & Linda Queipo,	44.	
	Residents of Town of Kingston		
18.	Marie Caruso	45.	
19.	Paynter/Kolber	46.	
20.	Rt 28 Scale, Route 28 Material Supplies, Inc.	47.	
21.	Stan Morabito, Route 28 Material Supplies, Inc.	48.	
22.	Garrick Bryant, DEC Division of Air Resources	49.	
23.	Dixon Onderdonk, Kingston PB Chair	50.	
24.	845-339-2041	51.

^{*}Attendee was present in meeting but phone number was not visible.

ATTACHMENT V PUBLIC MEETING MINUTES AND Q&A QUESTIONS

Date: January 31, 2024

Time: 11:00 AM – 12:00 PM

Venue: Microsoft Teams – Joinable via the application or call-in number

Meeting Facilitator: Edward G. Davidson, PG (*EGD*) of JMT of New York, Inc., technical consultant to the applicant and assisted by Joeseph F. Castiglione (*JFC*), Esq of Young/Sommer LLC, Counsel to the applicant.

Meeting Minutes by: David Straw, Alexandra Carroll, and Andrew Philbin. All JMT of New York, Inc.

Acronyms used in the Meeting Notes

1101011,1110 01000 111 0110 1110001115 1 1 0 0 0 0			
NYSDEC	New York State Department of Environmental Conservation		
EJ	Environmental Justice		
DAC	Disadvantaged Communities		
EPPP	Enhanced Public Participation Plan		
SEQRA	State Environmental Quality Review Act		
NYSDOT	New York State Department of Transportation		

Notes:

- JMT team logged in at 10:55 AM to ensure that all the technical components of the meeting are functioning correctly.
- At the start of the meeting, there were 11 attendees, which increased to +/- 37 over the course of the event.
- *EGD* begins the meeting by introducing himself as the consultant to the applicant, and the meeting as being a component of NYSDEC's EJ policy and EPPP.
- *EGD* informs all attendees of the process on how to raise their hand and unmute to ask questions, that questions can also be written in the meeting Q&A, and how to contact JMT for help if they have technical issues during the meeting.
- *EGD* proceeds to give a background of the project and the coordinated SEQRA review process that took place for the Town of Kingston Site Plan Approval.
- *EGD* provides a summary of the past mining operation and the approved reclamation objective of commercial use.
- *EGD* reiterates the procedure (how to raise hand, unmute, etc.) for being able to speak and opens to questions at 11:15 AM.
- William J. Kemble ("WJK", Correspondent with The Daily Freeman) is the first attendee to ask a question:
 - WJK asks through the meeting Q&A about the timing of the traffic impact study, and if it should have been completed as part of the Town of Kingston's prior SEQRA review.

- o *EGD* answers that anticipated traffic levels associated with the project are approximately two orders of magnitude less than traffic levels currently on RT 28 and does not exceed thresholds described in NYSDEC SEQRA guidance documents that require additional studies, and so the Town of Kingston concluded that there would not be traffic impacts from the project. *EGD* also provides that a traffic study was subsequently completed as part of the applicant's consultation with NYSDOT in a process separate from SEQRA.
- JFC adds that during the Town of Kingston SEQRA review, the NYSDOT did provide input and were aware of the project from the outset.
- Kathy Nolan, MD ("KN" Resident of Shandaken, Ulster County Legislator and Senior Research Director of Catskill Mountainkeeper) verbally asks question(s):
 - o **KN** states that she cannot access the Q&A function, but that other attendees have access to it. **KN** states that Environmental Justice (EJ) and Disadvantaged Communities (DAC) were not mentioned during *EGD*'s introductory statement of the project and asks why this was the case. **KN** states that she has additional questions if there is time.
 - o *EGD* states that he will answer the first question and will come back to her if time allows and reminds participants that there should be a button towards the top right of their screen to open up the Q&A functionality and provides other avenues, including The Daily Freeman, the online EPPP repository, and JMT's phone number for accessing contact information for the purpose of submitting comments.
 - EGD answers that the facility is located next to, but not in, an area mapped as a potential EJ community, and that the EJ policy has been applied based on the facility's location and that they are applying for an Air State Facility (ASF) permit. EGD provides that DAC is separate from EJ and comes in play for other areas of review and analysis but is not directly a component of EJ.
 - o **EGD** asks **KN** if she has any follow up questions.
 - o **KN** asks if correspondence could be provided between the Applicant and NYSDEC with respect to DAC and any completed DAC analysis, and any implication to potential EJ areas. **KN** also states that there are EJs to both the east and west of the Facility, and that she will "cement" some written comments and mapping with respect to that.
 - KN asks about "the timing of air quality tests", if they have been completed, and if there
 have been any findings of concern, and if so, what types of mitigation have been considered
 or would/could be put in-place.
 - o *EGD* answers with regard to air testing that there have been none completed to-date and explains that the characterization of the facility has been based on highly conservative emissions calculations accounting for a "worst case scenario" and not a real-world operation. He notes that the facility meets all standards and will be required to comply with annual maintenance to ensure that compliance remains in-place and that the Applicant will be required to report annually on production and associated emissions.

- Taylor Jaffe ("TJ" resident of Livingston Manor and from Catskill Mountainkeeper) asks a question via the Q&A:
 - o TJ asks if any spatial emissions and/or air quality modeling has been completed as part of the review process to determine the projected GHG and co-pollutants of the project, with a focus on potential impacts to EJ communities. TJ also asks if it has not been completed, if there are plans to complete it as part of CLCPA.
 - o EGD responds to TJ that there has been no detailed modelling completed for this facility,
 and that emissions will be low enough to be protective of human health or other
 environmental considerations.
 - o **JFC** adds that associated information is provided in the online EPPP document repository.
- **WJK** verbally asks question:
 - WJK asks, when the facility is in operation, will Wiedy's Furniture be able to smell the operation?
 - EGD responds to WJK that the question of odor impacts to Wiedy's and other nearby sensitive receptors came up during the Town's review, and that a detailed analysis was completed for compounds associated with odors coming from asphalt plants. EGD further explained that the results of the analysis indicated that Wiedy's Furniture and other nearby sensitive receptors would not be impacted by odors.
- KN verbally asks question:
 - o **KN** asks for clarification that the online materials provided for the project are all based on calculations and not "actual measurements" of formaldehyde, HAPs, and other materials.
 - o *EGD* responds that the calculations are based on AP-42, an EPA published emissions estimating document, and states that there is no current testing data available for the site as it is not operational. *EGD* provides that AP-42 is conservative and modern asphalt plants typically produce lower levels of emissions than are predicted by AP-42 based calculations, and that AP-42 provides a "worst-case" scenario for consideration during the permitting and review process. *EGD* reiterates that the results of the AP-42 analysis indicate that there will be no adverse impact from the project with respect to air.
- **WJK** asks question(s) verbally:
 - o **WJK** asks what would happen if Wiedy's Furniture does in fact smell the facility once it is operational and what the remedy would be.
 - WJK also asks if *EGD* himself regularly drives along RT 28.
 - o **EGD** responds that he does drive along RT 28 every month or two, as he regularly hikes in the Catskills and that he drives past a much larger asphalt plant during his daily work commute.

- o EGD explains that if odors were experienced during operation then the recourse would be
 to contact the facility, local government representatives, or the NYSDEC, with any
 concerns or complaints.
- JFC adds that the Town could also be contacted and that these types of projects are associated with permits, and the permitting authorities could be contacted to determine if there are any violations or compliance issues.

• **KN** asks question(s) verbally:

- KN is concerned that calculations do not allow for comparisons over different periods of time and states that she recently experienced "quite a bit of odor coming from the facility" and thought that it may have started for the purpose of emissions testing for empirical data.
 KN states that the odor was noticeable in her car when driving by and hopes that NYSDEC will put in place some type of empirical monitoring.
- o KN also asks about the source of materials to be used in the asphalt product and the claim that the asphalt product may be used for municipal projects may have strict requirements for those materials.
- o **KN** also asks if the Town of Ulster was a part of the coordinated review process.
- o KN concludes by pointing out an error in the project documents that describe authorized activities at 850 RT 28.
- o *EGD* begins by answering the question relating to the quality requirements for produced materials and where the materials would be purchased from. *EGD* explains that the facility will be capable of using virgin material and that Callanan's East Kingston Quarry is an example of a source for virgin material. *EGD* also explains that the facility will be capable of using recycled material and the NYSDOT standard specs includes a specification that allows for the use of up to 70% recycled material, which is a benefit to both the operation from a cost perspective and to the environmental from the beneficial reuse of material, *EGD* also explains the plant will be capable of producing material for municipal, residential, and commercial projects.
- EGD responds to the question regarding the involvement of the Town of Ulster during the review process and explains that they were provided formal correspondence and were included in multiple rounds of correspondence with NYSDEC. EGD also stated that the Town provided comments during the review process.
- o **JFC** adds that the project is in the Town of Kingston, and the Town is responsible for the review of the project, not the Town of Ulster, but the Town of Ulster was kept informed as a non-permitting agency.
- Andy Mosey ("AM"- Woodstock Land Conservancy) asks a question (s) via Q&A:
 - o AM asks if there has been a recent noise study associated with this project.

O EGD notes that the facility is an existing and active bedrock quarry, and that Rt. 28 Materials Supplies has never had a violation while operating the mine. EGD further explained that a noise impact assessment was completed as part of the process of RT 28 taking ownership and operation of the quarry, and that the SEQRA process for the asphalt plant determined it would be consistent with or lower than existing operations. Therefore, it was determined there would be no potential noise impacts.

• **TJ** verbally asks a question (s):

- o TJ states that NYSDEC is currently going through the process of implementing regulations for implementation of CLCPA requirements, and that agencies should not be disproportionally affecting DACs in the permitting processes and that permits for GHG and co-pollutants in those communities must show a reduction in emissions over time. TJ asks if this facility currently a plan in place has to demonstrate a decrease in emissions and co-pollutants over time.
- O JFC provides that the facility is a project going through NYSDEC review as part of the Town of Kingston Site Plan Approval, for which review began in 2021 and was completed in 2022. The applicant cannot speak for NYSDEC and is undergoing review based on regulations currently in-place and cannot speak to future regulations that DEC may implement.
- o **EGD** follows up that we have completed a CLCPA analysis inclusive of potential disproportional impacts to DACs and the document is available on the online repository for the project. The findings of the CLCPA analysis is that the project is consistent with CLCPA and does not show disproportionate impact to DACs.
- L. Piperno is provided with the opportunity to comment, but no comment is received. *EGD* suggests that they submit a comment in the Q&A or in writing.
- Kevin Smith ("KS" Board Chair of the Woodstock Land Conservancy, Chair of Ulster County Trails Advisory Committee) notes that he is speaking on behalf of the Woodstock Land Conservancy and not the County and is also speaking on behalf of non-motorized travelers of RT 28.
 - KS asks if the traffic study considered people outside of motor vehicles and commented that RT 28 is an officially signed bike route and that NYSDOT and Ulster County have Complete Streets policies. KS asks if the traffic study considers Complete Streets policies.
 - o *EGD* notes that he commutes via bicycle when possible and is sensitive to this issue but that RT 28 is a commercial corridor and currently has significant traffic, including heavy trucks. While non-motorized users were discussed during the review process, given the existing level of traffic, relatively low level of additional traffic from the project, and lack of roadway improvements associated with the project, non-motorized users of RT 28 were not a significant consideration during the SEQRA or NYSDOT review process.
- **EGD** notes that he has not heard any comments from the call-in numbers and reiterates the process for asking a question as a call-in attendee.

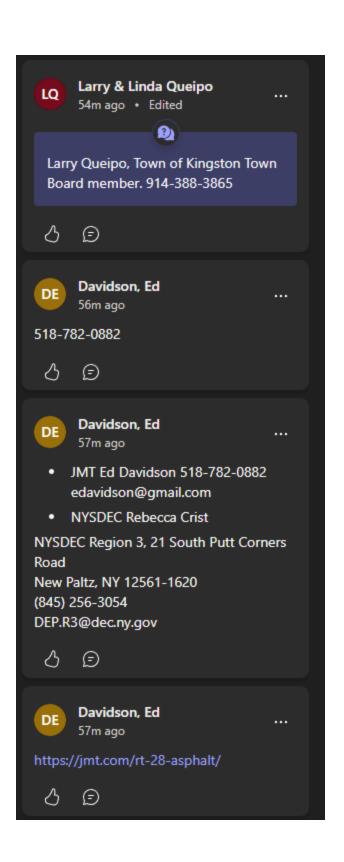

MEETING MINUTES RT 28 ASPHALT MATERIALS SUPPLIES, INC. ENHANCED PUBLIC PARTICIPATION PLAN– PUBLIC MEETING

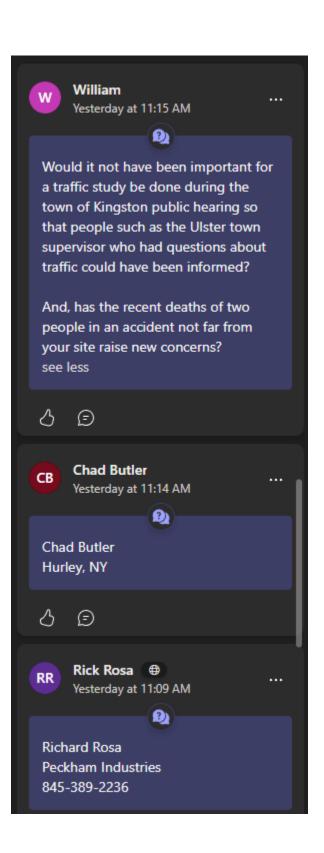

- Elena Morgan with NYSDEC's mining program speaks to note that she is attending as an observer.
- Robert Calogero ("RC", Town of Kingston Code Enforcement Officer) provides a verbal comment and question:
 - o RC states that the Town Planning Board did a great job with the project, looked closely at all the information, and that he is confident that the project is not an environmental concern. RC also notes that he inspects the facility twice a month, and that during a recent inspection, after a heavy rain event, the facility was in good compliance and kept pristine and is safe and clean, and that he thinks it will be a great addition to the Town of Kingston. RC further states that he has not heard of EJ/DAC and that it was not part of the Town's review and that none of them had ever heard of it.
 - o **EGD** responds to the mapped EJ and DAC and notes that there are multiple metrics by which EJ and DAC are defined and multiple ways in which they are incorporated into different levels of review by different programs within different agencies and government bodies. **EGD** notes that EJ and DAC are extensive subject areas, and notes that there is extensive information available to the public, including on NYSDEC website.
 - o **JFC** adds that EJ and DAC is something that NYSDEC considers during their review and not something that would be part of the Town of Kingston's review.
- Joel Mason ("JM", Resident of the City of Kingston) asks a question verbally:
 - o **JM** states that he lives 3 miles down wind of the facility and asks if the extent to which the emissions travel from the facility has been considered.
 - o **EGD** responds that based on the low level of production and associated emissions, the potential for the concentration of any emission to exceed the allowable threshold at the "fence line"/ property line has been determined to not exist. Accordingly, the direction of prevailing winds was not a major consideration given the low level of emissions.
- WJK asks questions verbally:
 - o **WJK** states that since *EGD* has driven RT 28, he is aware that it is in the Catskills and notes that the "often referenced" commercial facility to the north of the proposed operation is set back from the road whereas this operation will be out in the open. **WJK** asks if there has been consideration for screening to be more congruent with the local character. **WJK** also states that a fully loaded truck is more difficult to turn and operate than an empty truck and that achieving speed at this corridor is tough and wonders if the completed studies considered this.
 - o EGD responds to the truck question and notes that NYSDOT has been involved during the review process so that they could weigh in on the entrance design, its location, and the ability to serve the facility. EGD further notes the Town also reviewed the entrance during the review process and considered emergency vehicle access.
 - Regarding visual impacts and screening, EGD notes that visual impacts were a significant component of the Town of Kingston's SEQRA review process and notes that since RT 28

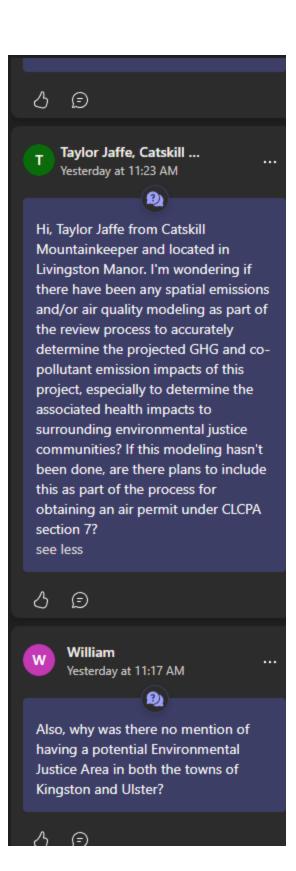

MEETING MINUTES RT 28 ASPHALT MATERIALS SUPPLIES, INC. ENHANCED PUBLIC PARTICIPATION PLAN– PUBLIC MEETING

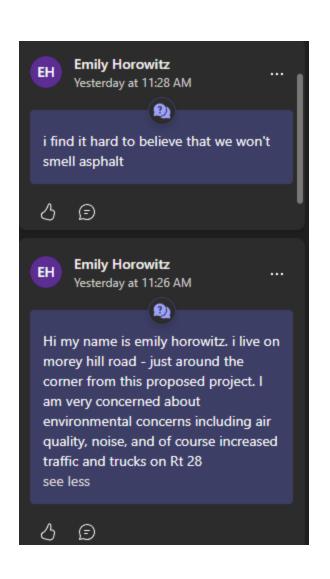

Materials has taken ownership of the facility, they have improved screening and that the Town requested measures for aesthetic purposes be implemented or kept in-place to limit potential views into the site. *EGD* summarizes the visual impacts assessment by stating that the change in use from the quarry to the asphalt facility has no potential to create visual impacts and that was the conclusion of the Town during their review process.

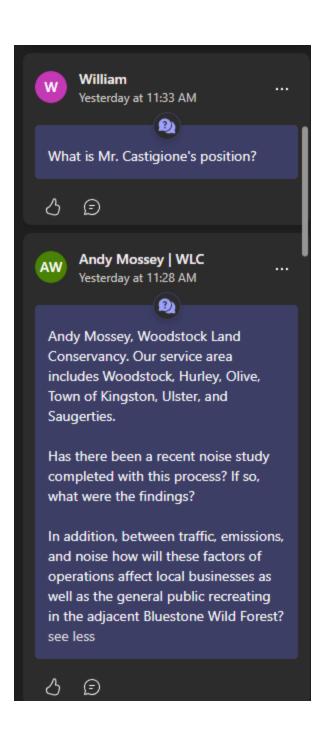

- o **JFC** adds that the Town of Kingston identified this area specifically in its zoning for this type of use as being a permissible use.
- *EGD* notes that the meeting time has run out and asks that any remaining comments be submitted before the end of the open comment period and reminded attendees that JMT can be called if there are any questions, or if anyone needs assistance accessing project documentation.

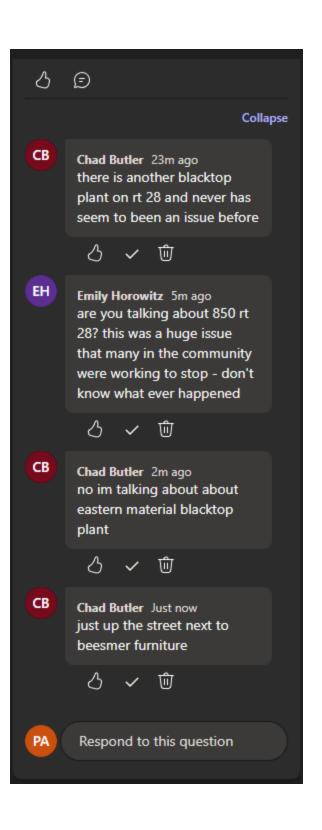

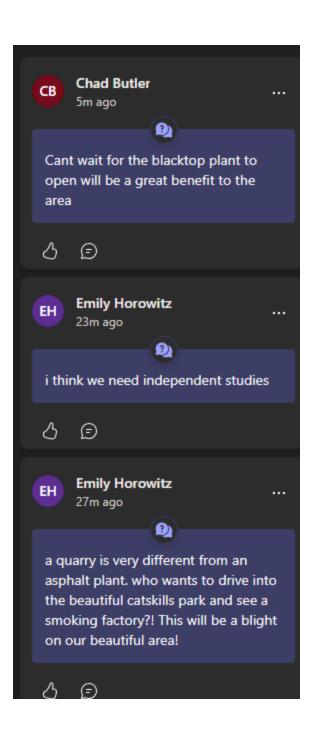

ATTACHMENT VI

TABLE 1 – SUMMARIZED MEETING COMMENTS AND RESPONSES

TABLE 1 ROUTE 28 VIRTUAL PUBLIC MEETING SUMMARIZED COMMENTS AND REPONSES

Public Question/ comment	Route 28 Response
How were the Potential Environmental Justice Areas (PEJAs) and Disadvantaged communities (DACs) determined and why it wasn't discussed during the SEQR process?	The facility is located next to, but not in, an area mapped as a PEJA, and that the PEJA policy has been applied based on the facility's location and that they are applying for an Air State Facility (ASF) permit. Additionally, that DAC is separate from EJ and comes in play for other areas of review and analysis but is not directly a component of EJ.
Emission Calculations. Was any air modeling completed for air emissions?	Emissions for the facility were calculated based on the planned production of asphalt from the facility and the US EPA's Compilation of Air Pollutant Emissions Factors from Stationary Sources (AP-42) document. It was emphasized that AP-42 is conservative and that modern asphalt plants typically produce lower levels of emissions than are predicted by AP-42 based calculations. In summary, calculations based on AP-42 provide a "worst-case" scenario for consideration during the permitting and review process. Detailed modeling was not completed for this facility because emissions will be low enough to be protective of human health and other environmental considerations.
Traffic concerns, and why was the traffic study not completed during the SEQRA process?	Anticipated traffic levels associated with the project are approximately two orders of magnitude less than traffic levels currently on New York State Route 28. This volume of traffic does not exceed the threshold described in the NYSDEC SEQRA guidance documents that would require additional study. Based on the findings, the Town of Kingston concluded that there would not be significant traffic impacts from the project. The June 2023 traffic study was subsequently completed as part of the applicant's consultation with NYSDOT in a process separate from SEQRA.
What visual impacts will the facility have on the surrounding area	Visual impacts were a significant component of the Town of Kingston's SEQRA review process and noted that, since Route 28 has taken ownership of the facility, they have improved facility screening. During the Town approval process, the Town requested measures for aesthetic purposes be implemented or kept in-place to limit potential views into the site. The submitted visual impacts assessment, by stating that the change in use from the quarry to the asphalt facility has no potential to create adverse visual impacts; a conclusion the Town agreed with during the review process. The facility is within a Town designated commercial corridor and similar uses are present throughout this section of New York State Route 28.
Nearby receptors and corridor travelers had odor concerns regarding the facility	A detailed analysis was completed for compounds associated with odors coming from asphalt plants during the Town's review. The results of the analysis indicated that nearby sensitive receptors would not be impacted by odors. Residents can contact the facility, local government, and NYSDEC with any concerns or complaints, which would determine if there are any violations or compliance issues at the facility with respect to odor.
Has there been a recent noise study associated with this project?	The facility is an existing and active bedrock quarry, and Rt. 28 Materials Supplies has never incurred a violation while operating the mine. A noise impact assessment was completed as part of the process of RT 28 taking ownership and operation of the quarry, and the SEQRA process for the asphalt plant determined it would be consistent with or lower than existing operations. Therefore, it was determined there would be no potential noise impacts.

ATTACHMENT VII ADDITIONAL PUBLIC CORRESPONDENCE

Call Log - Nora Budziak

Nora Budziak
"LAW" (Land/Air/Water)
Ulster, NY
aeinora@aol.com
845-336-4502

Nora Budziak called on 2/5/2024 and talked with A. Messina, looking for additional information on emissions. Nora Budziak did not email or leave a message.

Edward Davidson returned the call on 2/6/24 11:30 AM. Details of the call included the following:

- 1. Nora Budziak expects Jim Quigly to address the project via official channels.
- 2. Nora Budziak was concerned about environmental impacts, air emissions, direction of emissions (prevailing wind).
- 3. Nora Budziak advocated for productive re-use of land.
- 4. Nora Budziak expects comment from Hurley & Woodstock due to prevailing winds.
- 5. Nora Budziak mentioned formaldehyde concerns.
 - Edward Davidson noted pending regulations, thresholds, NYSDEC guidance & acceptable levels, 32,000 tpy production.

Following conversation, Edward Davidson forwarded Nora Budziak NYSDEC contact info, project file link, and NYSDEC proposed 220-3 link.

From: Emily Horowitz

To: <u>Davidson, Ed; dep.r3@dec.ny.gov</u>
Subject: [EXTERNAL] 530 Rt 28 project

Date: Thursday, February 8, 2024 9:42:00 AM

Cyber Security Reminder: Please use caution - message originated outside JMT.

Hello,

My name is Emily Horowitz and I live at 220 Morey Hill Rd in Kingston, just over a mile away from this proposed project. I want to express my sincere apprehension about this project which to be clear, I do NOT support. I am extremely concerned about air quality and pollution, noise pollution, air pollution, increased loud heavy trucks on an already intense-to-drive and dangerous Rt. 28, as well as environmental concerns and concerns about decreased property values.

This project just doesn't seem like a good fit for our community and it is my sincere hope that it will simply remain as a quarry. There are other more heavily industrial areas that would be better suited for this industrial project. Let's keep Catskill Park a beautiful oasis for future generations!

Thank you so much for taking my view into consideration.

Sincerely, Emily Horowitz 220 Morey Hill Rd Kingston NY 12401

ATTACHMENT VIII VIRTUAL PUBLIC MEETING INVITES AND FACT SHEETS

YOU ARE INVITED

Second Virtual Public Meeting February 15th at 5:30 pm

Route 28 Asphalt Material Supplies, Inc. Air State Facility Permit Application and Route 28 Material Supplies, Inc.

Mined Land Reclamation Permit Modification

Route 28 Asphalt Material Supplies, Inc. has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for an Air State Facility Permit for the proposed operation of the existing hot mix asphalt plant at Route 28 Quarry. As part of this action, the current reclamation plan for the Route 28 Materials Supplies, Inc., mining permit is being revised to incorporate the end-use of the facility as a hot mix asphalt plant. A Public Participation Plan has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29), and one virtual public meeting has been held. The purpose of this second meeting is to provide additional opportunity to submit questions and/or comments for those unable to attend the first meeting.

To Join

http://tinyurl.com/3ss38jfe

To Call-in Using a Phone

Dial in using the following number:

1-443-948-6058

When prompted, enter the Meeting ID:

450 444 429#

Agenda:

- Project Overview
- Background
- Scope of work
- Project schedules
- Community Impacts
- Proposed Mitigation Measures
- Questions and Answers

Your Attendance is Important!

Project personnel will be available to answer questions from the community. For additional information on the proposed project:

- Contact: Edward Davidson by phone at 518-782-0882 or by email at edavidson@jmt.com
- Visit the repository at: https://jmt.com/rt-28-asphalt/

Contact the project liaison to request reasonable accommodation for a disability or interpreter services in a language other than English, so that you can participate in the call and/or to request a translation of any of the event documents into a language other than English.

Route 28 Asphalt Material Supplies, Inc. Air State Facility Permit Application and Route 28 Material Supplies, Inc. Mined Land Reclamation Permit Modification Fact Sheet

- **Project:** Air State Facility Permit Application and Mine Land Reclamation Permit Modification
- Applicants: Route 28 Asphalt Material Supplies, Inc., and Route 28 Material Supplies, Inc.
- Facility: Route 28 Quarry is located on at 530 Route 28 in the Town of Kingston, Ulster County, New York
- **NYSDEC Application Numbers:** 3-5199-00042/00008, 3-5199-00042/00006
- A Public Participation Plan (PPP) has been developed in accordance with NYSDEC Commissioner Policy
 29, Environmental Justice and Permitting (CP-29)

What is the Proposed Project?

Route 28 Asphalt Material Supplies, Inc., (Route 28) plans to produce hot mix asphalt (HMA) from the proposed operation of the existing HMA plant within the current boundaries of Route 28 Quarry. The facility will produce a maximum of 30,645 tons of hot mix asphalt per year which will be used for paving roads in local projects for municipalities, state and county agencies, and private contractors. As part of this action, the current reclamation plan for the Route 28 Materials Supplies, Inc., mining permit is being revised to incorporate the end-use of the facility as an HMA plant.

Why does Route 28 need to apply for an Air State Facility Permit?

Production of hot mix asphalt at the facility will result in combustion emissions. Route 28 has chosen to purposely limit asphalt production to 30,645 tons per year to comply with mass emission limits for formaldehyde. An Air State Facility Permit is needed so that the Department of Air Resources (DAR) can enforce the limitation by way of a permit condition.

How might the project affect the surrounding community?

The surrounding community will not be negatively affected by the Air State Facility Permit for the proposed operation of the existing hot mix asphalt plant. The proposed operation of the existing hot mix asphalt plant will produce a maximum of 30,645 tons of hot mix asphalt per year. This volume of asphalt will effectively cap all pollutants below Air Facility Registration requirements, and therefore impacts from the HMA plant on the surrounding community will be minimal.

How can I participate in the permit review process?

- Attend the upcoming second virtual public meeting scheduled for February 15th at 5:30 pm to learn about the project, ask questions and/or express concerns about the project.
- Ask questions, express concerns, provide input or submit by comments in writing, by phone or email to the project contact person identified below.
- You can request to be notified when the application is complete or submit comments in writing during the public comment period to the DEC contact person identified below.

Where can I get more information about the proposed project?

- Visit the online document repository at: https://jmt.com/rt-28-asphalt/ to obtain application materials, relevant documents, and information about the project.
- Contact Edward Davidson by phone at 518-782-0882 or by email at edavidson@jmt.com for information on the
 project, instructions on how to attend the upcoming virtual public meeting, or to find out about the status of the
 permit application and public comment period.

Who is responsible for reviewing the Permit Application?

Rebecca S. Crist, NYSDEC Region 3, 21 South Putt Corners Road, New Paltz, NY 12561-1620, is responsible for reviewing and issuing the required permits. Tel: (845) 256-3054; email: DEP.R3@dec.ny.gov
